The 3rd Quarter of 2019 – Module Details

Community Involvement

Module Code: EDP8

Speaker: Prof LO Chin Man Edward

Specialist in Community Dentistry

BDS(HK), MDS(HK), PhD(HK), FCDSHK (Community Dentistry),

FHKAM (Dental Surgery)

Professor Lo is Professor of Dental Public Health in the Faculty of Dentistry of the University of Hong Kong. He also holds a number of honorary and visiting professor positions in major dental schools in China. He is the chairman of the Specialty Board of Community Dentistry in the College of Dental Surgeons of Hong Kong. Professor Lo is a renowned expert in oral epidemiology, preventive dentistry and community dentistry and has given invited presentations in a number of major international dental conferences and written more than 250 scientific journal articles and book chapters.

Date & Time : 7 July 2019 (Sunday) 9:30 am – 12:30 pm

Venue : Rooms 903-4, 9/F, HKAM Jockey Club Building,
99 Wong Chuk Hang Road, Aberdeen, Hong Kong

Language : English

CPD Credit : HKDA CPD hours: 3, DCHK CPD points: 3, CDSHK CME points: 3 (Cat A)

Synopsis

There are different types of oral health care system in different countries, and Hong Kong, as a Special Administrative Region in China, has its own unique system. The behaviours of both the oral health care providers and consumers are influenced by the structure, organization, and financing of the oral health care system. The first part of the presentation will describe the current oral health care system in Hong Kong. The activities and role of the oral health care providers in the public and private sectors will be described, as well as the latest findings on the oral health related behaviours and status of the people in Hong Kong.

The second part of the presentation will focus on the effectiveness of various kinds of preventive oral health interventions, especially those which can be implemented in community-based programmes. The latest clinical evidence from systematic reviews will be presented. The role of dental profession in promoting the oral health of the population, with particular focus on the situation in Hong Kong, will be discussed.

Venue : Rooms 903-4, 9/F, HKAM Jockey Club Building,
99 Wong Chuk Hang Road, Aberdeen, Hong Kong

Language : English

CPD Credit : HKDA CPD hours: 3, DCHK CPD points: 3, CDSHK CME points: 3 (Cat A)

Synopsis

As dentists, we use therapeutic agents nearly every day. The main drugs we use include local anesthetics, antibiotics, and analgesics. The presenters will review the pharmacodynamics and pharmacokinetics of these agents, and provide clinical updates on the usage of these medications.

Patient's medical status would affect our prescriptions' regime, as the drugs prescribed to them could lead to adverse reactions and medical complications. As the proportion of elderly patients in our population continue to grow, and they tend to have more chronic health problems, understanding the side effects of the drugs could ensure these patients be treated safely.

Venue : Rooms 903-4, 9/F, HKAM Jockey Club Building,
99 Wong Chuk Hang Road, Aberdeen, Hong Kong

Language : English

CPD Credit : HKDA CPD hours: 2, DCHK CPD points: 2, CDSHK CME points: 2 (Cat A)

Synopsis

Injury to both the primary and permanent teeth and the supporting structures is one of the most common dental problems seen in children. The management of dento-alveolar trauma in children is distressing for both child and parent and often difficult for the dentist. Trauma to the dentition should always be considered an emergency situation. It occurs frequently and results in functional and aesthetic disturbances accompanied by concern from both patient and parent. The dentist's responsibility is to act objectively and efficiently in such a situation.

The children should be carefully assessed regarding treatment needs before commenting to parents because many cases are not as bad as they first appear. Initial reassurance to both parent and child is of great value. Trauma not only compromises a previously healthy dentition but may leave a deficit that also affects the self-esteem and quality of life and commits the patients to lifelong dental maintenance. After this lecture, attendees should be able to describe and identify various types of traumatic injuries to primary and permanent teeth and their management. In addition, attendees should provide appropriate urgent dental treatment of traumatic dental injuries and knowing when to refer to a specialist or medical practitioner based on their clinical assessment.

Dr Ng is also a member of the Infection Control Standing Committee of the GDS. She participated actively in the preparation and implementation of Dental Unit Waterlines protocols, and the revision of the Basic Protocol (Infection Control Guidelines for the Dental Service, Department of Health).

Date & Time : 1 September 2019 (Sunday) 9:30 am – 12:30 pm
Venue : Rooms 903-4, 9/F, HKAM Jockey Club Building,
99 Wong Chuk Hang Road, Aberdeen, Hong Kong
Language : English
CPD Credit : HKDA CPD hours: 3, DCHK CPD points: 3, CDSHK CME points: 3 (Cat A)

Synopsis

Dental healthcare professionals are at an increased risk of being infected because of the potential presence of bloodborne pathogens in saliva and blood, and the increased chance of needle-stick injuries. The goal of infection control is to break the chain of disease transmission. In this lecture, international infection control guidelines as well as local guidelines will be discussed, with an emphasis on how to apply these guidelines into daily practice.

Date & Time : 29 September 2019 (Sunday) 2:00 pm – 4:00 pm

Venue : Rooms 903-4, 9/F, HKAM Jockey Club Building,
99 Wong Chuk Hang Road, Aberdeen, Hong Kong

Language : English

CPD Credit : HKDA CPD hours: 2, DCHK CPD points: 2, CDSHK CME points: 2 (Cat A)

Synopsis

Dental profession is a very demanding career. Besides the skill and knowledge of the dental surgeon, the set up, operation and management of the dental clinic are equally important. Dr Liu will go through the requirements for the set up of a dental practice suitable for MGD Part II examination. He will also show the things one can do in the dental practice to maximize time use and eventually remuneration. But the most important thing is to have a peaceful mind when you finish work every day. Dr Liu will cover areas from surgery design, time management, staff training and practice marketing.
